                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |        |    |             |  |      |             |        |           |         |       |           |             |          |     |           |  |  |  |           |   |              |     |    |  |                 |    |           |  |   |     |                 |    |                |  |  |  |                 |     |               |  |  |  |            |    |                |     |    |  |                 |    |     |  |    |     |                 |    |                |  |  |  |                |     |      |  |  |  |                |    |            |     |    |  |            |    |         |  |    |     |                |   |         |  |  |  |              |     |    |  |  |  |                  |   |    |     |    |  |                  |    |  |  |    |     |              |    |  |  |  |  |             |     |    |  |  |  |                |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |     |    |  |  |  |  |  |    |
